

...

This time, Variation 1 of Tetromino L fits perfectly in the top left corner. Now, we can place the Tetromino I in the remaining space:

...

...

The Tetromino I fits perfectly in the remaining space using Variation 1 (vertical placement). Therefore, the correct variation of Tetromino L that fits into the target rectangle is:

A. 1

The initial attempt to place Variation 1 of Tetromino L was incorrect because it was not placed in the top left corner. Upon correcting the placement, we find that Variation 1 does indeed fit, and the Tetromino I can be placed afterward to complete the puzzle.

(c) Example case of Self-refine - Page 3
